

Hello!

You are receiving this letter as an invitation to take part in an exciting new parenting program implemented by the Montgomery County Educational Service Center and provided for FREE with funding by Montgomery County ADAMHS.

Triple P-Positive Parenting Program is an evidenced based support program that can target any parent/caregiver audience. Triple P provides support and information to build parent confidence and self-regulation as well as to encourage greater parental involvement.

Triple P has several programs available for parents, however, in February we are introducing the Triple P Seminars. Seminars are 90 minute presentations with 30 minutes reserved for specific parent questions or concerns. Parents are encouraged to complete a confidential survey following all seminars. In this survey is the option to sign up for Triple P Primary Care. Primary Care allows parents to benefit from additional individualized support in their home. They can share specific concerns, create goals and objectives and work with me to develop a plan to improve the concerns they have in regards to their child.

Along with this letter you are receiving the schedule for our February Triple P seminars. All are via the Zoom platform and vary in time & day to accommodate parent schedules. If you are interested in your parents taking part in these seminars you may simply send out the attached schedule. Everything a parent needs to participate is included in that flyer. They simply click to register and I take care of the rest.

I encourage each of you who are interested in learning more about Triple P to email me at natalie.jenkins@mcesc.org or to sign up to drop in for one of the seminars. I am also able to share data based on parent attendance should you need additional information, for example if you are a part of our Schools of Excellence programming.

Thank you so much for your consideration of this programming. We believe it to be a valuable asset to families as well as our schools and communities.

Natalie Jenkins, MSW, LSW
Prevention Educator for Triple P-Positive Parenting Program
Montgomery County ESC

"The fact that you worry about being a good parent means you already are one"
